#### **DETAILED ACTION**

## Claim Objections

1. Claim 20 is objected to because of the following informalities: the term antennae is associated with insects. The correct pluralization of antenna is antennas and it is suggested to employ such spelling. Appropriate correction is required.

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brady et al. (6249227).

Regarding Claim 20, Brady et al. show in Figure 4E or 4F, for example, an apparatus 400, 422 comprising an RFID circuit (IC) 424, an interconnect system 444 and 446 connected to the IC 424 such that one or more (antenna) devices 448 can be operatively attached to the interconnect system whenever the orientation of the RFID IC is in any of a plurality of positions with respect to the one or more devices, all arranged as claimed. Although Brady does not specifically show the RFID IC 424 in various positions, it would have been obvious to the skilled artisan that the IC 424 may be in any position regardless of the position of the connected device 448 or antenna, particularly since the interconnect system 444,446 includes a mounted connector 446 on the housing

Art Unit: 2821

422 and connects the device 448 via coaxial cable. The antenna 442 in Fig. 4E may be mounted in any number of positions. Similarly, the IC 424 may also be mounted in many different positions within the device 400. Evidence of various orientations is shown in Figure 5A where the antennas and IC's are oriented on various structures and components.

#### Response to Arguments

4. Applicant's arguments filed 6/23/2006 have been fully considered but they are not persuasive. Specifically, motivation for modifying the arrangement of the RFID IC's and antennas therfor is clearly set forth and shown in Fig. 5A of the reference. A skilled artisan would have found it obvious to arrange the antennas and IC's in a positional relationship because a coax cable is used to interconnect these devices. The rejection stands.

#### Allowable Subject Matter

5. Claims 21- 37 are allowed.

#### Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2821

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
